

## HANDY INFORMATION SHEET

# BREAK DOWN

Break Down is an allowable input for organic growers.

- What is it?** A ready to use enzyme based organic ferment.
- What does it do?** Break Down initiates and accelerates the break down of organic residue and returns nutrients to the soil.
- Where and when to use it?**
- Gardens:** Apply Break Down to garden areas (soil or mulch) to improve the environment for the soil biology and plants to thrive.
- Lawns:** Apply Break Down to degrade thatch and lawn clippings.
- Pathways:** Spray Break Down over pathways and gravel driveways to breakdown leaf litter, organic material and to complete the weed breakdown cycle after using a herbicide.
- Compost:** Use Break Down in your compost to initiate and accelerate the composting process of but not limited to vegetable scraps, lawn clippings, leaves, twigs and small branches.
- How often do you use it?** Generally every 3 to 4 weeks.  
Or as required
- Application Rates.** 50ml Break Down mixed in 1 Lt of water.  
Spray area until wet.
- Coverage area.** 1Lt of Break Down when diluted will cover up to 400 square metres
- Other information.** Works in all weather conditions  
Won't harm living plants  
Safe to use around children and pets  
Vegan Friendly  
**For best results** use in conjunction with Earthlife Rock Minerals  
**Available:** 1Lt and 2.5 Lt containers
- Caution:** Use of this product may cause an environment that may decrease the viability of seed germination.
